

RESOURCES FOR EMPOWERMENT IN WOMEN'S LIVES

No society can prosper without providing equal access to resources from women and men so that they are empowered to shape their own lives and contribute to their families and communities. Resources and opportunities that act as building blocks for empowerment include education, employment, and health care. Demographic and Health Surveys collected data on aspects of women's and men's access to resources in 47 countries during the years 2000-2012.

Education

Despite Millennium Development Goal 2 – universal primary education for both girls and boys – 1/4 of girls age 15-24 in 12 of 47 countries and 1/4 of boys in 6 of 41 countries have no education.

In nearly every surveyed country, more men than women can read¹ and have completed primary² or secondary school.³

Over time, more women are completing secondary school.² However, less than half of women in 42 countries have completed secondary school.³

Employment¹

In 33 of 45 countries, more than 50% of women work, including 13 countries where more than 75% of women are employed.

Almost everywhere, more men are employed than women.

Fewer employed women are paid in cash than employed men in 20 of 34 countries.

Health Care

At least 50% of women receive 4 or more antenatal care visits from a skilled health provider in 28 of 47 countries.⁴

HOSPITAL

In 31 of 47 countries, more than half of births are delivered by skilled health providers.⁵ In 28 countries, half or more of births take place in health facilities.

More than half of women age 15-49 in 31 of 41 countries report at least one problem accessing health care, such as getting permission to go, getting money for treatment, distance to health facility, or not wanting to go alone.

At least 1 of 10 girls age 15-19 has started childbearing in 35 of 47 countries.

¹Respondents are women and men age 15-49.
²Respondents are women and men age 15-24.
³Respondents are women and men age 20-49.
⁴Respondents are women age 15-49 who had a live birth in the 5 years before the survey.
⁵Denominator is live births in the five years before the survey.
