

USAID
FROM THE AMERICAN PEOPLE

Fighting MDR-TB with Bedaquiline

480,000* cases of
multidrug-resistant tuberculosis (MDR-TB)
every year

210,000 deaths from
MDR-TB in just 2013*

Current **MDR-TB** treatment is

Bedaquiline, the first new drug to treat TB in more than 40 years, brings **new hope** to patients fighting MDR-TB with little to no other treatment options.

**BEDAQUILINE
DONATION
PROGRAM**

The bedaquiline donation program is an innovative public-private partnership between USAID and Janssen Therapeutics of Johnson & Johnson. The donation of bedaquiline, combined with technical support provided by USAID, will enable patients in nearly 100 countries to access this life-saving medication and fight MDR-TB.

2013; Estimates of TB and MDR-TB burden are produced by WHO in consultation with countries.
